

BETTER

MARKETING,

BY DESIGN.

A light-themed digital system that keeps the oversized confidence of an agency front page — big type, bold grids, room to breathe — and runs it on TAAM orange against clean paper white.

BRAND	THEME	TYPEFACE	ACCENT
TAAM — Better Marketing	Light / Paper white	Montserrat	#F46325

01

DESIGN PRINCIPLES

Four ideas pulled straight from the brand values — Focused, Creative, Results-driven, Collaborative — translated into rules for the screen.

01

SCALE WITH INTENT

One element per screen is allowed to be huge — a headline, a logotype, a section label. Everything else stays calm so the big thing reads as a choice.

02

LIGHT, NOT LOUD

Paper-white backgrounds, generous whitespace, hairline dividers. Orange is the spark, never the wallpaper — it appears in roughly one of every six surfaces.

03

GRID DOES THE TALKING

Work and news live in a confident bento grid. Cards are uneven on purpose so the eye moves; alignment keeps it from feeling chaotic.

04

EARN THE MOTION

Hover lifts, a single scroll reveal, nothing that bounces for its own sake. Reduced-motion users get stillness, not a broken page.

02 COLOR

The core palette is exactly the brand board: one primary orange, near-black ink, light-gray fields, and white. On a light theme, white and paper carry most of the page.

Primary Orange
#F46325 · accent, CTAs, links

Near Black
#111111 · ink, headings, footer

Light Gray
#F2F2F2 · fields, image fallback

White
#FFFFFF · cards, surfaces

ORANGE TINT SCALE — USE FOR FILLS, HOVERS, AND LARGE SOFT SHAPES

#F46325

#FF7B42

#FF9A66

#FFB38C

#FFD5C2

Usage ratio target: ~70% paper/white, ~18% ink & gray, ~12% orange (including tints). On light backgrounds use orange #F46325 for text only at 16px+ bold to stay legible; for smaller labels, keep orange for emphasis words and set the rest in ink.

03

TYPOGRAPHY

One family, Montserrat, doing every job — Black for display, Bold for headings, Regular for body. The contrast comes from weight and size, not from mixing faces.

04

LAYOUT & SPACING

12-column grid, 1200px max width, 32px gutters. Spacing follows an 8px base step. Corners are soft (14–16px) on cards, fully round on pills.

The oversized vertical section labels (see the faint **COLOR** and **TYPE** words at the edges above) are the signature device, borrowed from the agency layout but softened to a 12% orange tint so they sit behind content instead of fighting it.

05

COMPONENTS

The building blocks, rendered live. Hover the cards and buttons to see the interaction states.

NEWS LIST

April 15, 2026

IMPACT OVER OUTPUT: INSIDE THE NEW TAAM

Why the future of marketing isn't about making more — it's about making it matter.

April 16, 2026

TAAM NAMED TO MOST INNOVATIVE COMPANIES

Recognised for impact and a commitment to fuelling client growth.

February 9, 2026

RESULTS THAT MOVED THE ROOM

Six brands, one quarter, measurable lift across every channel we touched.

APP ICON & FAVICON

Use the rounded-square aperture mark for favicons, PWA icons and avatars. Keep clear space equal to the height of the letter "A"; never recolor it outside the orange/white pairing.

06 VOICE & USAGE

Tone of voice straight from the brand board: confident, clear, creative, results-driven.
We speak with clarity, act with purpose, and build partnerships.

DO

- ✓ Lead with one bold statement, then explain plainly underneath.
- ✓ Let white space carry the confidence — resist filling every corner.
- ✓ Use orange to mark the single most important action on a screen.
- ✓ Keep headings uppercase and tight; keep body sentence-case and roomy.
- ✓ Name things by what the visitor does: "Start a project," not "Submit."

DON'T

- ✗ Flood backgrounds with orange — it stops being an accent.
- ✗ Mix in a second typeface; weight and size give you all the range you need.
- ✗ Set long paragraphs in orange or all-caps; reserve both for emphasis.
- ✗ Stretch or recolor the logo, or place it on a busy photo without clear space.
- ✗ Animate everything; one deliberate motion beats ten reflexive ones.
